

TEO5

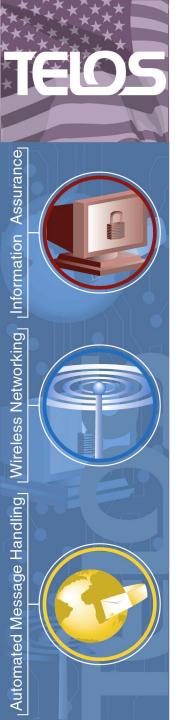

Xacta Web C&A: Automating the Transition of DoN Legacy Systems/Applications to NMCI

Presented to the NMCI Industry
Symposium
18 June, 2003

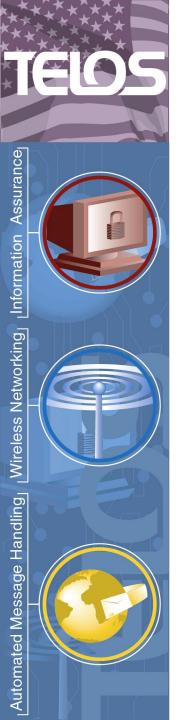

Agenda

- Legacy
 Applications/Systems/Networks and NMCI
- The Legacy System Transition Process
- Xacta Web C&A 4.0: Automate and Manage the Process

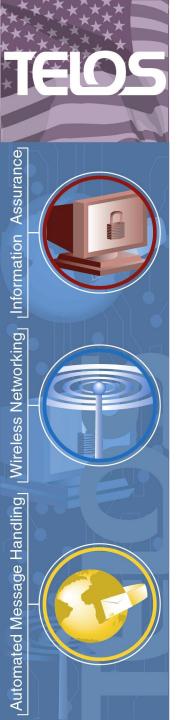

Achieving the full potential of NMCI

- The NMCI vision can only be fully realized when that network can support all the functions it takes to run the Navy
- This means integrating all the Navy specific applications and systems so they can run on NMCI
- Each NMCI site encounters many legacy systems/networks

Who is Responsible for Legacy Applications?

- CIOs
- Central Design Activities
- Echelon 2 Commands
- Functional Area Managers

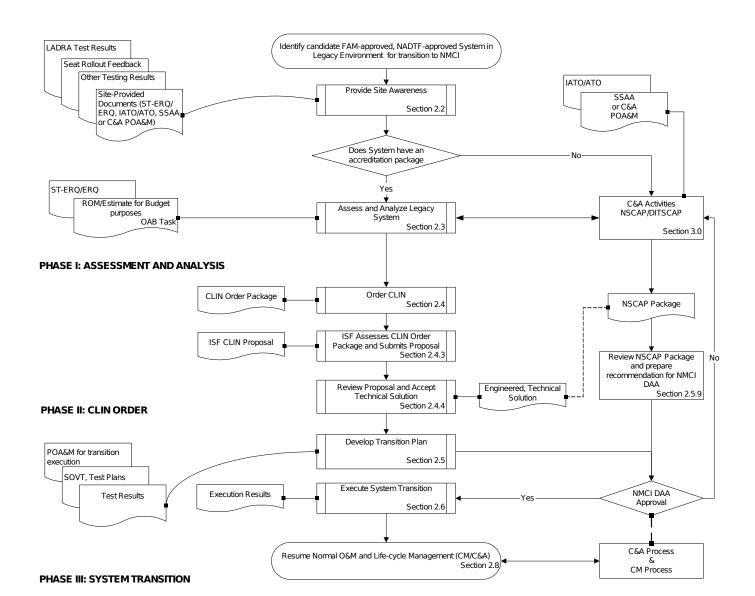

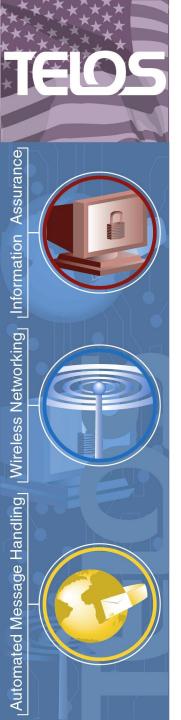

Transitioning to NMCI

- No "Free Lunch"
 - Transition the legacy application to run on the NMCI network (CLIN 29)
 - Gain NMCI connection approval for the legacy system/application (CLIN 27)
- All solutions require NSCAP (NMCI Security Certification and Accreditation Process) and/or DITSCAP
- Telos and Xacta can help

Assurance Automated Message Handling, Wireless Networking, Information

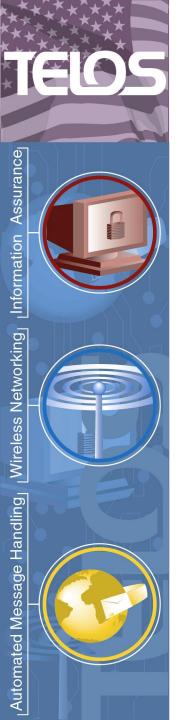

Transitioning the Legacy System

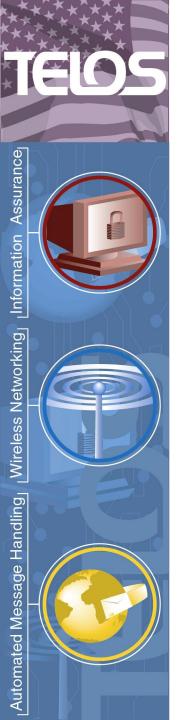

NMCI Specific Considerations

- Consider how the NMCI user will utilize your application
 - Browser only (Web-enabled per TFW)
 - NMCI Hosted
 - NMCI Connected
 - Your servers, your network connected to NMCI
 - Desktop element vs. Server / System
 - Site C&A for a single local instance
 - Type accreditation for enterprise deployment
 - Inside DMZ

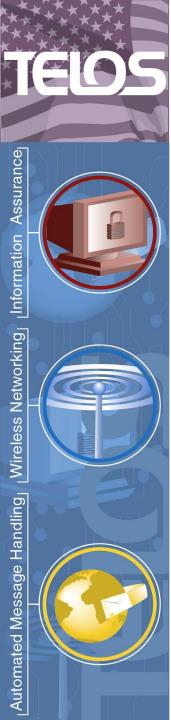

NMCI Considerations cont.

- NMCI enforces existing DON/DoD security policies
 - Navy IA Pub 5239-13 Vols. I-III
- NMCI requires a functional certification
- Resources (available at www.nmci.navy.mil)
 - NSCAP: NMCI Security Certification & Accreditation Process
 - LSTG: Legacy System Transition Guide (available soon)
 - NEADG: Navy Enterprise Application Developers Guide
 - NRDDG: NMCI Release Development and Deployment Guide

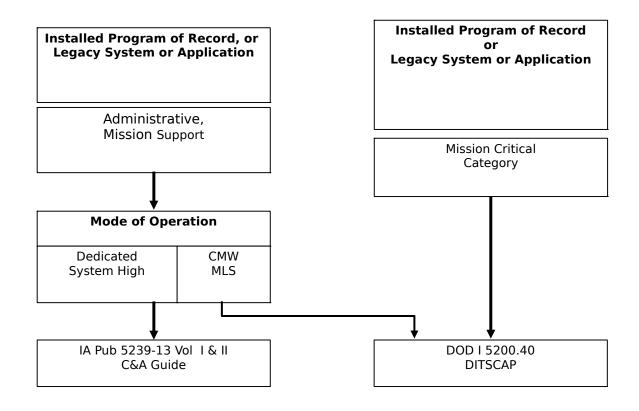

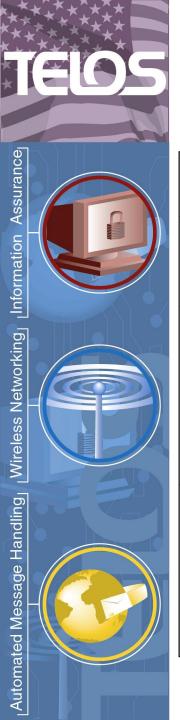

NSCAP

- Level of Effort is tailored based on
 - Mission criticality
 - Complexity
 - Mode of Operation
- May offer a more immediate path to IATO
 - Bridge to full DITSCAP and ATO, not a replacement
 - Some applications may go sunset before a full DITSCAP is needed
- Interpret and map accreditation requirements to systems/applications being transitioned

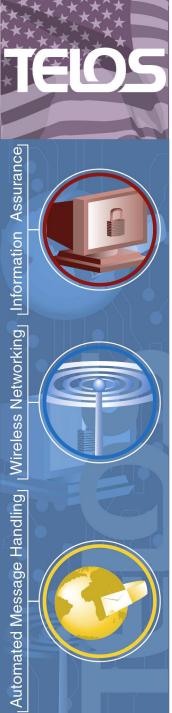

NSCAP C&A Level of Effort Guidance

NSCAP IA Requirements

Legacy System/Application Complexity	Level of Effort For: Mission Support/ Administrative Systems	Level of Effort For: Mission Critical Systems
Desktop/Client: Simple*	Requires: Risk Assessment •Functional and Security Certification Testing •Mobile Code Assessment	Requires: •Functional and Security Certification Testing •Mobile Code Assessment
Desktop/Client: Complex	Requires: Risk Assessment ** per Navy IA Pub 5239-13 Vol II (rev 01) •Checklist & Automated Vulnerability Assessment Tool •Functional and Security Certification Testing •B2 Firewall Baseline Configuration Compliance •Mobile Code Assessment •Navy Marine Corp NIPRNet Enclave Protection Policy Compliance	Requires:
Server Based/DBMS: Complex	Requires: Risk Assessment** per Navy IA Pub 5239-13 Vol II (rev 01) • Checklist & Automated Vulnerability Assessment Tool • Functional and Security Certification Testing • B2 Firewall Baseline Configuration Compliance • Mobile Code Assessment • Navy Marine Corp NIPRNet Enclave Protection Policy Compliance	Requires: •Functional and Security Certification Testing •B2 Firewall Baseline Configuration Compliance •Mobile Code Assessment •Navy Marine Corp NIPRNet Enclave Protection Policy Compliance •DITSCAP ST&E and Risk Assessment •SSAA

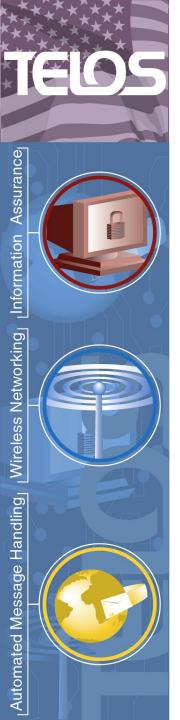

Telos/Xacta contribution

Xacta Web C&A

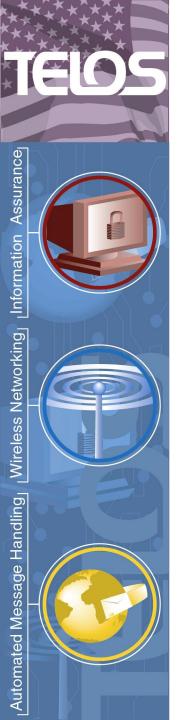

XWCA configured for NSCAP (Navy content and workflow, integration w/ other Navy tools like Securify)

Xacta on site support and services available through Telos (C&A, IA Services, Secure Software code audit, other IA products and services)

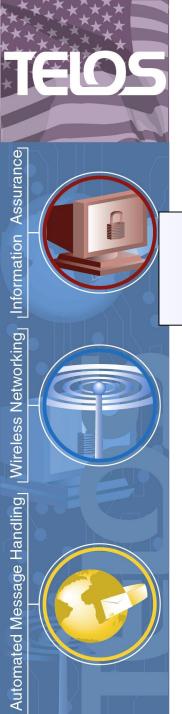

Telos/Xacta contribution

- Telos: 30+ years government experience
- Xacta (Telos subsidiary): 13+ years IA experience
- Xacta Web C&A
 - Mature product (version 4.0)
 - Evaluated and/or recommended and being piloted by DON Organizations
 - SPAWAR (PMO, IATT, PMW-161)
 - COMNAVNETWARCOM
 - "An enterprise tool to support C&A at the CDA and ISSM level is crucial for getting to and maintaining secure networks."
 - Capt Bob Whitkop, COMNAVNETWARCOM N6, 1 April 2003
 - Director NMCI (PEO-IT)
 - APPLICATION SERVER MIGRATION PILOT Project
 - "The contractor shall validate the viability of Telos' Xacta Web technology as a Certification and Accreditation tool to be available to the enterprise as a centrally provided tool to track C&A data for all systems."
 - Agency-wide adoption by: IRS, Army COE, Air National Guard, Dept. of Education

Xacta Web C&A Background

- Browser based software application designed to automate the security certification
 accreditation (C&A) process
- The software includes
 - Auto-Discovery (Xacta Detect)
 - Vulnerability Scan (Nessus)
 - Automatic generation of
 - Security Requirements Traceability Matrix
 - Test Plans
 - Risk assessments
 - SSAA documentation (including all appendices)
 - Workflow management
 - Executive reporting tools
- Continuous assessment of system & enterprise risk

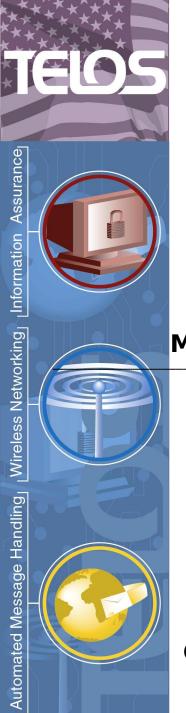

The Xacta Solution Software and Services That Enable Customers to Evolve From:

Compliance to

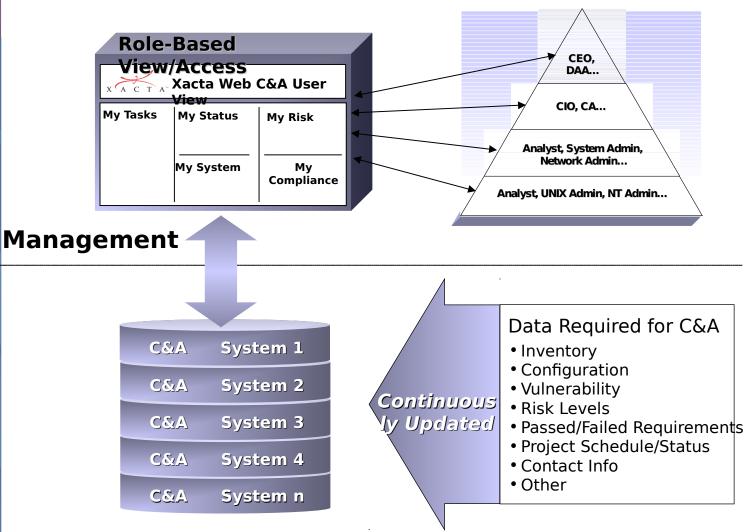

Enterprise Risk Management

- Standards-based, C&A process compliant risk assessment
- Automated utilities for routine tasks (network discovery, inventory, system configuration, vulnerability scanning)
- Vast knowledgebase of security/agency regulations/policies correlated with test procedures
- Consistent, repeatable, efficient documentation generation capabilities

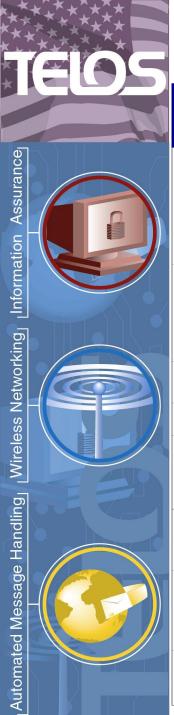

- Ability to identify change and assess its impacts on a daily or weekly basis rather than every three years
- Continuous risk profile, always-on
- Vulnerabilities matched to inventory to drive automated testing and alerts
- Hierarchical views pertinent to all levels of an enterprise; enable drill down to risk element detail and equipment configuration properties

From Compliance to Management

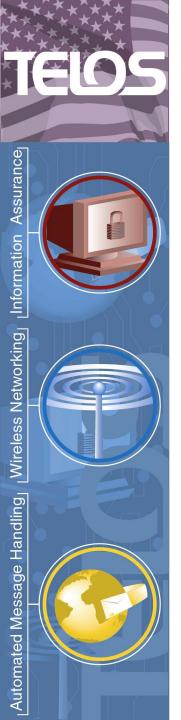

Compliance

One Application, Many Capabilities

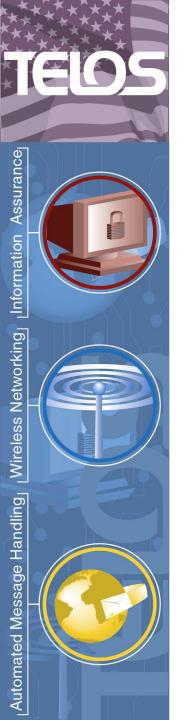

1	Functional Components	Xacta Software (Component Capabilities)	OTHER PRODUCTS/VENDORS (Xacta Does/Could Work With)
	Detect	 System Discovery & OS Detection Inventorying Utilities Vulnerability Scanner Vulnerability Notification Service 	 DoD IAVA, DISA STIGs, Harris STAT, Securify, NESSUS, CERT Advisories, ISS, Tivoli, AF TCNO, NetRecon, SecurityAnalyst, iDefense, SecurityFocus.com, HP-OV, CA Unicenter, SecureInfo, Symantec ESM
	Protect	 Compliance to Standards Risk Calculation & Mitigation Model Process Automation & Enforcement 	 Big 5, Systems Integrators, Work Flow Product Vendors (Handysoft, Qlink, QualTrax)
N	React	 Configuration Alerts & Notifications 	MSSP, EM/ESM Product Vendors
	Work Flow	Customizable Work Flows	Bizflow, Activeflow, Qlink
	Knowledgebase	 Requirements, Regulations, Vulnerabilities, Impact Statements, Trend Data, Systems Information 	Boutique Security Firms, Big 5, Systems Integrators
	Reporting	Automated Document PublishingManagement & Project Status Reports	Manual Templates, Crystal ReportsManual Query & Reporting
	Architecture	Web Server (Apache/Tomcat/Catalina)Database-drivenMS Windows & Office Compatible	 IBM WebSphere, MS IIS, Oracle, MS SQL, DB 2, MS Access, Solaris, Linux, HP-UX
	Consulting Support	via Chat & Email	 Boutique Security Firms, Big 5, Systems Integrators

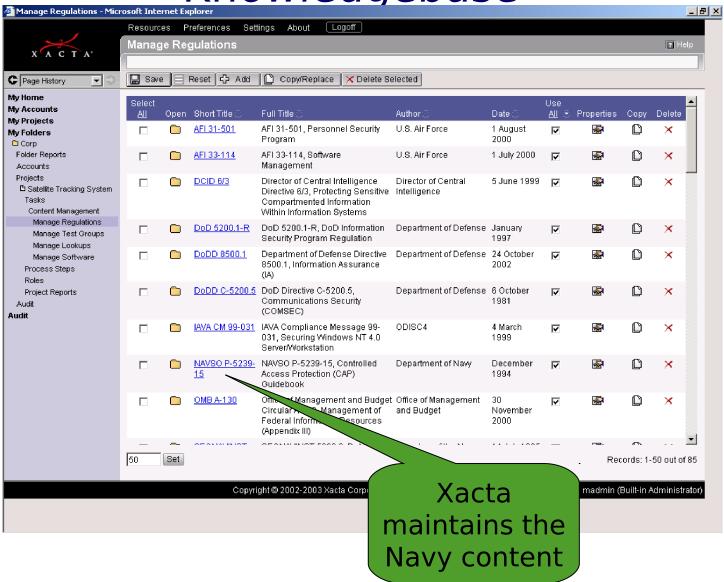

Xacta Web C&A is Tailorable to Support NMCI Legacy Transition

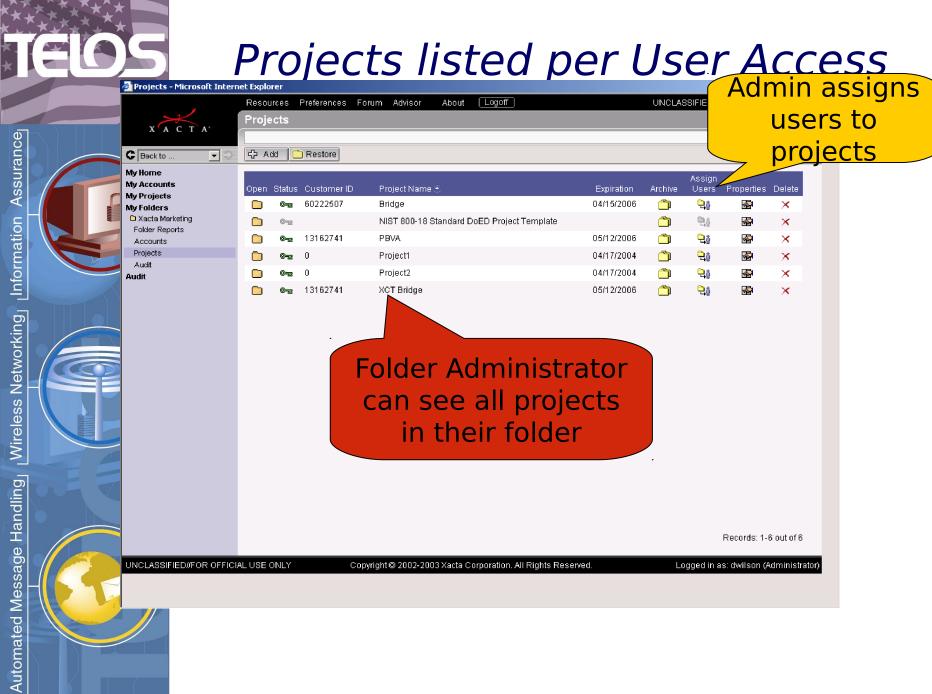

- Customizable workflow supports roles across multiple organizations
 - Site transition team, local DAA
 - CDA
 - EDS
 - SPAWAR (NMCI PMO, IATT, PMW-161)
 - CNNWC
- LOE/CLIN decision support
- NMCI specific IA policy
 - IA Pub 5239-13 I-III

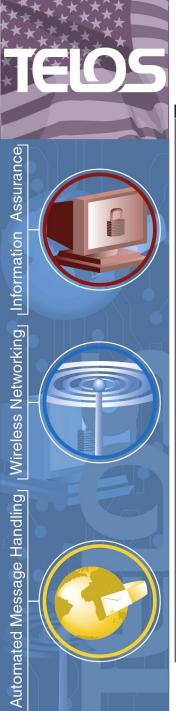

- Custom Checklists
 - ERQ
 - NSCAP
 - Test Plans
- Custom Reporting
 - NMCI specific risk/vulnerability assessments and status reports
 - Aggregated for the site, Command, CDA, POR, FAM, DAA level
- Custom Publishing
 - CLIN specific documentation packages

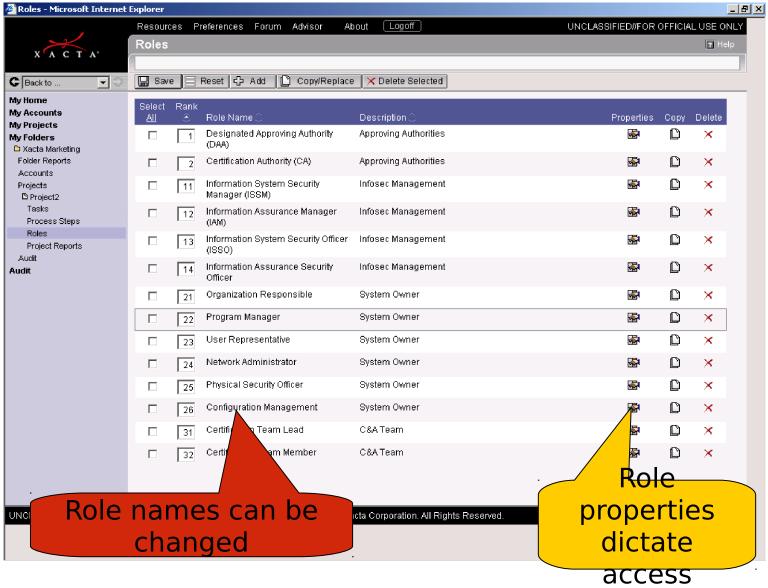

DON Regulations in Knowledgebase

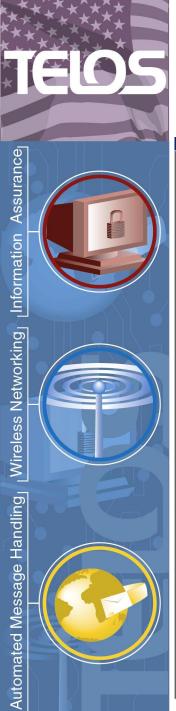

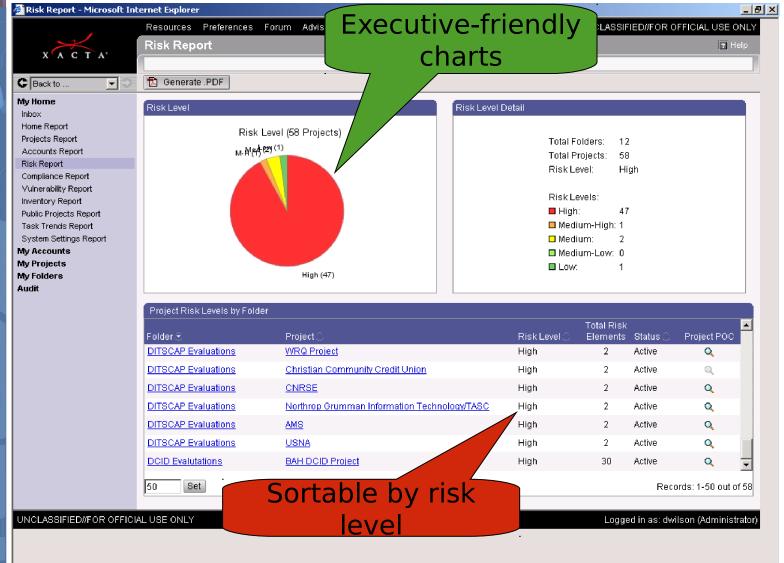

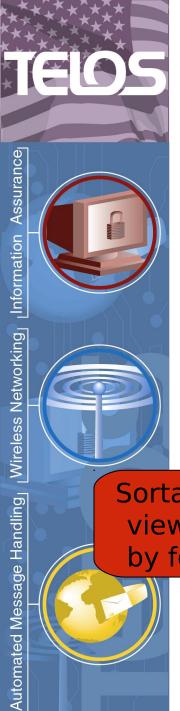

User Access by Project Role

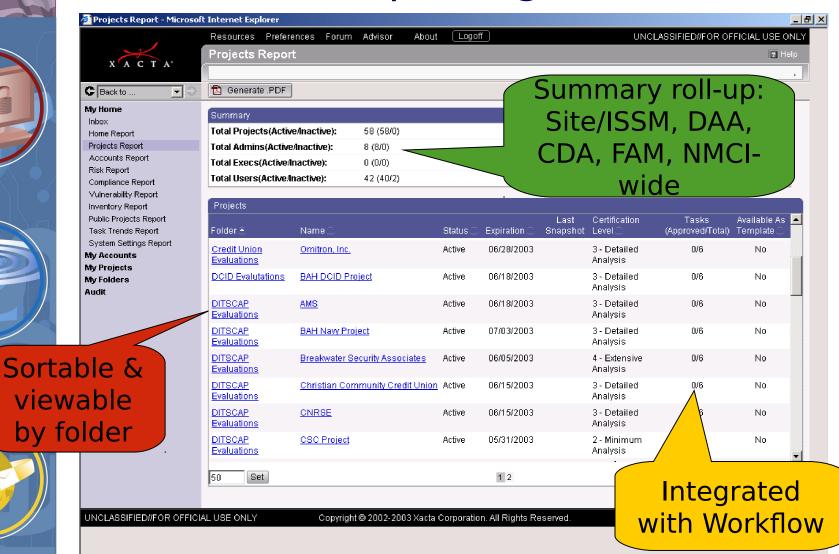

IA Situational Awareness Reporting

Portalized Project Status Reporting

More Information
